

**The 7th International Conference on Asian Marine Geology (ICAMG) will be held October 11-14, 2011, in Goa, India.**

**<http://icamg7.nio.org/>**

**You are invited to join Session 3**

***“The Illusive Sea Level Threat in the Indian Ocean”***

**Convener: [Nils-Axel Mörner](#) (Sweden), [morner@pog.mn](mailto:morner@pog.mn)**

This symposium will be devoted to observational facts regarding sea level changes, the possible driving forces in climate, the behaviour of glaciers and where to direct the limelight with respect to urgent human problems.

- (1) Sea level changes in the Indian Ocean: observational facts**
- (2) What drives climate?**
- (3) Are glaciers melting?**
- (4) Stealing the limelight**
- (5) Concluding general discussion**

Resolution

After the meeting we hope to make a voyage to one of the islands in the [Laccadives](#), where the locals know so well that sea level is not at all in a rising mode, laugh about what is being claimed in the Maldives and say “it is all a matter of money”.
